

Revenue Planning & Controlling for all Hotel Departments

Developed for proactive hotel and revenue management: flexible and efficient revenue planning and controlling per department, automatically without any extra effort. Quick response in case of short-term changes and plan deviations.

Features

- Automatic data transfer of Actual, On-the-books and Forecast data via interfaces from PMS & RMS
- Smart planning of hotel revenues for different departments (Rooms, F&B, Parking, etc.)
- Flexible market segments: raw segments from the PMS or individually configurable segment groups
- Choice of daily or monthly planning
- Automatic distribution of monthly values to individual days
- Flexible event calendar, incl. past events
- Integration of benchmark data of competitors (Fairmas/STR)
- Planning total values or the pickup
- Easy to integrate into FairPlanner or use as a stand-alone solution
- License fee depends on number of rooms, between 820 € to 2,050 € per year/hotel
