

Hotel financial planning and BI built for profitability

FairPlanner helps hotels and hotel groups plan revenues and costs, improve forecast accuracy, standardize reporting, and gain clear visibility into performance across the business.

Budgeting & forecasting

KPI visibility

Connected data

Four ways it helps

Plan Revenues and Costs

Build budgets across departments using a hospitality-specific planning structure based on your P&L.

Forecast with Confidence

Use rolling forecasts and what-if scenarios to react earlier, model change, and support better decisions.

See Performance at a Glance

Track relevant KPIs, compare properties, and create clear reporting view for operations, finance, and leadership.

Connect Hospitality Systems

Connect PMS, ERP/accounting, RMS, benchmarking, and rateshopping data in one environment.

Connected hotel performance management

01 Connect

- Bring together connected source data
- PMS, ERP / accounting, RMS, Benchmarking

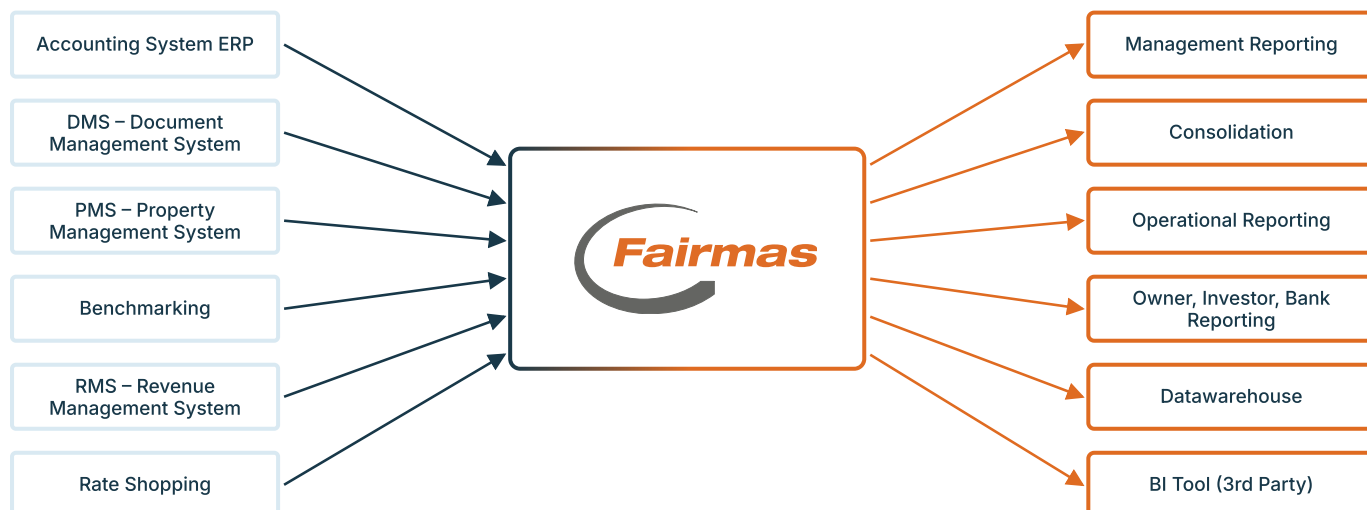

02 Plan

- Create budgets & rolling forecasts
- Budget planning, rolling forecasts, what-if scenarios, revenue & cost planning

03 Report
